Clothes hangers	61

## Concept

Chests of drawers, clothes panels, mirrors, cupboards, shoe cupboards – there is now a specific collection of elements to match every hülsta living room range which convey the corresponding atmosphere to the entrance hall. The most individual wishes can now be met by means of the wide choice of surfaces and materials going from fine veneers and solid woods to pure matt lacquers and the very popular high-gloss lacquers. It is also possible to combine these versions and achieve some most interesting effects.

The hallway ranges are enhanced by a neutral shoe cupboard and a diverse collection of accessories.

## Functions

The HALLWAY meets all the consumer's functional requirements. Besides storage space for typical items of clothing (coats, hats, shoes, umbrellas), there is room for the vacuum cleaner, correspondence, the telephone and other clothing items. Create some really functional units even where space is at a premium with our novel and ingenious clothes units.

A number of lamp systems as well as individual mirrors matching the various ranges round off the collection.

## Versions

Besides the wide variety offered by the different products, the various surfaces available offer you some genuine additional choices. Choose from genuine wood veneer, lacquer and high-gloss lacquer surfaces or even hallways made from solid wood.

## Hallway bench

- Clothes panel with 10 clothes hooks
- Clothes rod (aluminium-coloured, powder-coated), with swing-out mirror (four bag hooks at rear)
- With optional lighting (halogen spotlight, 12 V, 10 W, incl. transf. and footswitch)
- Also available in reverse order

**Important notes:** Fittings for wall mounting are provided with nearly all the units which should be used for your own safety and for constructional reasons. The assembly materials supplied by hülsta (plugs, screws) are only suitable for fitting components on to concrete and/or solid walls. Ideally, one should inquire about the soundness of the walls with regard to their suitability for mounting units when orders are placed and be sure to check them later before mounting any units. If any surfaces are not suitable for mounting units (e.g. plastered or lighter wall materials), one should use another method better suited to the material on site.
